

Anatomy & Physiology

The anatomy and physiology program is one of the most established and respected programs within the anatomy and physiology discipline. It is a computer-based program in which anatomy and physiology theory and practice receive equal emphasis as applied to both financial and managerial anatomy and physiology issues. It intends to support the career objectives of those looking to enter the job market upon graduation, as well as the academic needs of those looking to pursue advanced degrees. Required course work covers areas critical to success in today's anatomy and physiology workplace:

- Technical anatomy and physiology knowledge
- Communication and interpersonal skills
- Career-related computer literacy
- A laptop computer is recommended, but not required, for students entering the anatomy and physiology program.
